

The DPW - Transportation Division works with the Transportation Board to develop and implement all transportation policies, plans and regulations in the Town. Working with the DPW - Engineering Division, DPW - Highway Division, Planning Department, Police Department and Transportation Board, the DPW - Transportation staff provides technical support and administrative services in the following areas:

- development of neighborhood safety improvement policies and plans
- conduct small-scale traffic and parking studies
- development of intersection and traffic signal improvement projects
- use and placement of traffic control devices
- review of transportation access and construction management plans for new developments
- licensing and oversight of taxi-cab, valet, and livery industries
- administration of residential, guest overnight and commercial area employee parking programs
- development of commercial area parking policies and plans
- review of parking controls and regulations

Think Safety First When Using the Public Way

As the Town continues to focus on building a strong multi-modal transportation network that encourages cycling and public transportation as reasonable alternatives to personal vehicle use we strongly encourage all bicyclists and motorists to check out the new initiative ["Same Roads. Same Rules."](#): a guide to safer bicycling and driving within Massachusetts launched by MassBike, Massachusetts Departments of Transportation, Public Safety & Security, and Conservation & Recreation.
